

FLEX GEL

For application onto cotton and polyester

Non adhesive carrier

FLEX GEL is our foam material that will give your logos originality. Thanks to a new technology developed in our laboratory, this is a unique product on the market. The feature of this material, although 750 microns thick, is its soft 3D effect. Once pressed the design will become about 10% thinner but maintain the soft 3D effect.

SUGGESTIONS

We suggest after removing the carrier, to cover the design and re-press for 2-5 seconds. This can improve the feel and texture of the vinyl on the garment.

AFTER REMOVING THE CARRIER YOU MUST COVER AND RE-PRESS FOR A FURTHER 10 SECONDS. THIS WILL IMPROVE WASH RESISTANCE.

PLEASE NOTE

The technical data above are the results of our laboratory tests. We always recommend a small trial test of each product before production. We also recommend not to stock the materials in damp or high temperature rooms.
