

FLEX REFLECTIVE

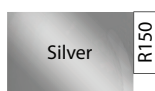

For application onto garments requiring high visibility

Non adhesive carrier

FLEX REFLECTIVE is our fully reflective cad-cut vinyl. The film consists of metallized micro-beads producing an extremely high level of refraction. The photometric values of the film exceed the minimum limits set by EN 20471 for reflective properties. This film is 60cm wide on the roll.

SUGGESTIONS

We suggest after removing the carrier, to cover the design and re-press for 2-5 seconds. This can improve the feel and texture of the vinyl on the garment.

PLEASE NOTE

The technical data above are the results of our laboratory tests. We always recommend a small trial test of each product before production. We also recommend not to stock the materials in damp or high temperature rooms.
